IN THE CLAIMS

Please cancel claims: 1 to 71.

72. (New): A golf tee-time reservation system for implementing seamless real time access to one or more golf courses, said system comprising:

means for inputting a tee-time request;

means for interfacing a protocol with one or more different protocols;

means for issuing one or more tee_time transactions to one or more golf course reservation systems;

means for displaying one or more tee-time schedules; and
means for reserving one or more tee-times from said one or more
golf course in real time.

- 73. (New): The golf tee-time reservation system of claim 72, wherein said means for inputting a tee-time request comprises a graphical user interface.
- 74. (New): The golf tee-time reservation system of claim 73, wherein said graphical user interface comprises a networked based interface.
- 75. (New): The golf tee-time reservation system of claim 74, wherein said networked based interface is the Internet.

- 76. (New): The golf tee-time reservation system of claim 72, wherein said means for interfacing a single protocol with one or more different protocols comprises a computer server.
- 77. (New): The golf tee-time reservation system of claim 76, wherein said computer server comprises a software translation package for interfacing said protocol with said one or more different protocols.
- 78. (New): The golf tee-time reservation system of claim 76, wherein said computer server is coupled with said graphical user interface.
- 79. (New): The golf tee-time reservation system of claim 76, wherein said computer server is one or more computing components.
- 80. (New): The golf tee-time reservation system of claim 72, wherein said means for issuing one or more tee-time transactions to one or more golf course reservation systems utilizes real time concurrent processing for obtaining one or more tee-time schedules from said one or more golf course reservation systems.
- 81. (New): The golf tee-time reservation system of claim 80, wherein said real time concurrent processing is performed using a central processing unit.
- 82. (New): The golf tee-time reservation system of claim 81, wherein said central processing unit divides said one or more tee-time transactions into multiple subprocesses for processing within one clock cycle.

- 83. (New): The golf tee-time reservation system of claim 72, wherein said means for displaying one or more tee-time schedules is displayed using said graphical user interface.
- 84. (New): The golf tee-time reservation system of claim 72, wherein said means for reserving one or more tee-time schedules is an available tee-time for said one or more tee-time schedules.
- 85. (New): The golf tee-time reservation system of claim 72, wherein said means for reserving one or more tee-time schedules is scheduled by a user.
- 86. (New): The golf tee-time reservation system of claim 85, wherein said user selects said one or more tee-time schedules using said graphical user interface.
- 87. (New): An external golf tee-time reservation system for implementing seamless real time access to one or more internal golf course reservation systems, said system comprising:
 - a user input module having an interface capable of receiving one or more tee-time requests;
 - an interface module processing said request as real time transactions; and a vendor service module linking said external golf tee-time reservation system to said one or more internal golf reservation systems.
- 88. (New): The external golf tee-time reservation system of claim 87, wherein said user input module comprises a networked based interface.

- 89. (New): The external golf tee-time reservation system of claim 88, wherein said networked based interface is the Internet.
- 90. (New): The external golf tee-time reservation system of claim 87, wherein said user input module is a terminal that receives said one or more tee-time requests.
- 91. (New): The external golf tee-time reservation system of claim 90, wherein said terminal comprises a graphical user interface.
- 92. (New): The external golf tee-time reservation system of claim 90, wherein said terminal displays information to a user.
- 93. (New): The external golf tee-time reservation system of claim 87, wherein said interface module is coupled to said user interface module.
- 94. (New): The external golf tee-time reservation system of claim 87, wherein said interface module comprises one or more computer servers.
- 95. (New): The external golf tee-time reservation system of claim 94, wherein said one or more computer servers is a database server.
- 96. (New): The external golf tee-time reservation system of claim 95, wherein said database server provides information upon request.
- 97. (New): The external golf tee-time reservation system of claim 94, wherein said one or more computer servers is a system service application server.

1429560v1 Page 5 of 8

- 98. (New): The external golf tee-time reservation system of claim 97, wherein said system service application server comprises administrative tools for regulating system resources.
- 99. (New): The external golf tee-time reservation system of claim 97, wherein said system service application server provides administrative reports.
- 100. (New): The external golf tee-time reservation system of claim 94, wherein said one or more computer servers is a network server.
- 101. (New): The external golf tee-time reservation system of claim 100, wherein said one or more network servers establishes a communication link to said vendor service module.
- 102. (New): The external golf tee-time reservation system of claim 94, wherein said one or more computer servers is a customer server.
- 103. (New): The external golf tee-time reservation system of claim 102, wherein said customer server administers said tee-time transactions by sending said tee-time transactions to said one or more computer servers.
- 104. (New): The external golf tee-time reservation system of claim 102, wherein said customer server comprises protocol translation software.
- 105. (New): The external golf tee-time reservation system of claim 104, wherein said protocol translation software translates one or more protocols into a common protocol.

106. (New): The external golf tee-time reservation system of claim 87, wherein said one or more internal golf course reservation systems comprises individualized reservation software for coupling to said external golf tee-time reservation system.

107. (New): The external golf tee-time reservation system of claim 87, wherein said vendor service module comprises a pre-established network for coupling said one or more internal golf course reservation systems to said external golf tee-time reservation system.

108. (New): The external golf tee-time reservation system of claim 107, wherein said pre-established network is coupled to said user interface module.
